

GC-1 ANCHOR

Anchors

PRODUCT OVERVIEW

Giant Oil Tools Model GC-1 Tubing Anchor Catcher is a mechanical set retrievable tool designed to hold the tubing string in tension or compression.

The GC-1 Tubing Anchor prevents movement of the tubing during pumping strokes. Landing the tubing in tension with the anchor increases pump efficiency, reduces rod and tubing wear, and will prevent the tubing and rods from falling downhole in the event of a part.

The GC-1 Tubing Anchor is available in both Left Hand and Right Hand set configurations.

FEATURES & BENEFITS

- Adjustable Safety Shear Release
- Drag Blocks allow the anchor to be run deeper than conventional drag spring anchors.
- Can be left in tension, compression or neutral.
- Available in Left Hand and Right Hand set configurations.
- Optional Carbide Slips available.
